VALUE: Lowest cost in the long run

Floor Trucks and Trailers that are going to perform best and last longest may sometimes cost a little more to buy. But they almost always provide the **lowest cost in the long run**. Longer life, less downtime, lower maintenance and repair cost, and greater productivity far outweigh initial cost savings.

While Hamilton products have long been respected for the quality materials and skilled workmanship they exhibit, their success begins with design expertise. Unprofessional designs, on the other hand, often result in trucks that are inefficient, awkward, or even unsafe. Perhaps the most penny-wise, pound-foolish mistake of all is seen in trucks that have been equipped with casters and wheels of inferior quality; for how can a vehicle be any better than the running gear that gives it mobility?

ERGONOMICS

Before using the selection chart on page 13, we have one suggestion for the specifier or buyer of wheeled equipment. This is awareness of the importance of rollability, which can be defined as the ease of starting and moving a loaded vehicle. Rollability will be affected by weight of the load, floor conditions, size and type of wheels and bearings, and of course, whether movement is to be manual or power-assisted. All other things being equal, a larger diameter wheel will generally roll more easily. Soft rubber treads—the quietest and the kind needed when floors are rough and littered—unfortunately produce the poorest rollability. So, oftentimes the wheel selected must represent a compromise; the phenolic “Plastex” Wheel, for example, rolls easily and is economical, but may be too hard or too noisy for some applications. Polyurethane wheels combine certain advantages of both...but at a higher price.

CAPACITY RATINGS

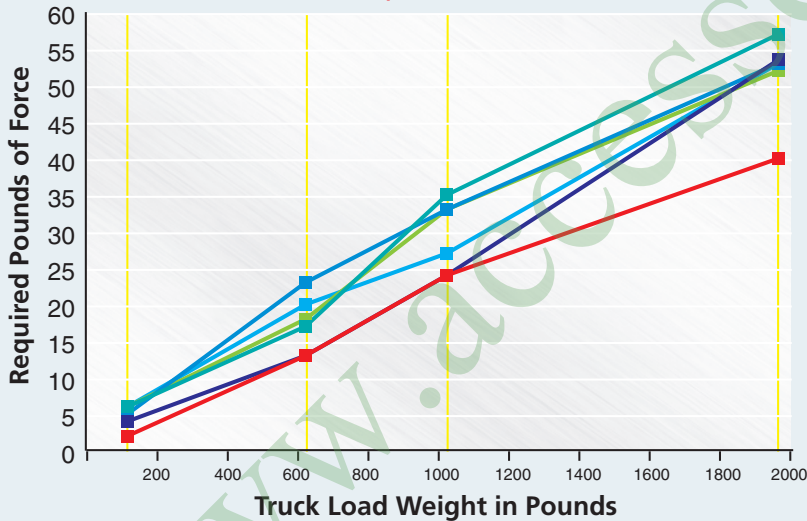

Except where otherwise indicated, capacity ratings shown in this catalog reflect wheel and caster ratings established by the Institute of Caster Manufacturers for 3 m.p.h. intermittent operation over relatively smooth floors. Although ratings include a safety factor for normal applications, you should choose extra capacity if shock loading, overloading, powered movement, rough surfaces, or unfavorable conditions are apt to be encountered. Remember, too: capacity ratings are often established differently by different manufacturers, **so ratings should never be used in place of specifications for making comparisons.**

Why Running Gear Matters

All five of the wheels tested were 8" x 2" moldon-rubber tires on cast iron centers on our PB1108 platform truck. As you see, the pounds force necessary to start a loaded truck in motion varies tremendously from wheel to wheel. Since Hamilton uses a premium rubber, rollability is significantly better than all the other wheels tested. Fully loaded, it takes 25% less force to start the truck with Hamilton wheels than the BEST of the five competitor wheels. Avoiding a back injury or other strain could pay for your Hamilton truck many times over.

Pounds of Pull to Start-up

Like Golf, Lower is Better

Key: Import 1 (blue square), Import 2 (green square), Import 3 (light blue square), Import 4 (teal square), Import 5 (dark blue square), Hamilton (red square)

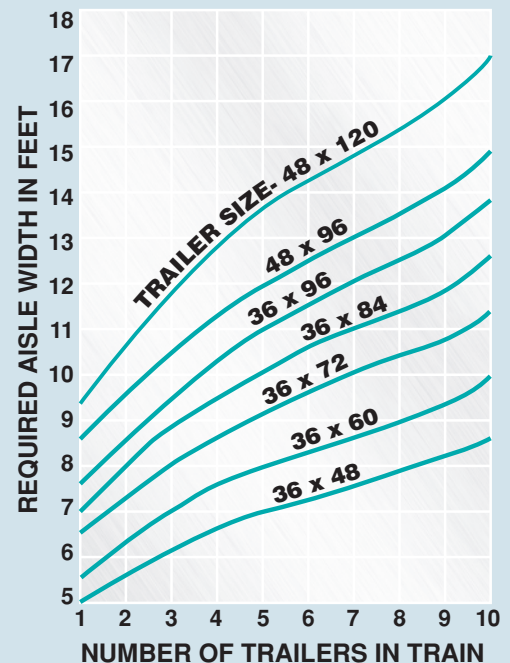

“JOB-BUILT” SPECIALS

The most efficient answer to your material handling problem could be a unit somewhat different in configuration, size or capacity from the many standard models shown in this catalog. Hamilton excels in the design and manufacture of custom-engineered trucks and trailers. Our complete machine shop, metalworking department, woodworking facilities, and contiguous caster and wheel plant enable us to produce exactly what you need, and at competitive prices. Catalog pages 112 and 113 show just a few of the many “Job-Built” Trucks we’ve built over the years.

AISLE WIDTH GRAPH

This graph shows 90° intersecting aisle requirements for selected sizes of caster-steer trailers. Included is a safety factor of 10% or 6" (whichever is greater), to allow for wall clearance and driver error.

The findings herein result from a technical report entitled, “How To Know They’ll Trail,” sponsored by Hamilton. This report details a nomograph method for quickly determining aisle requirements for any number of caster-steer trailers of any size.

HAMILTON®

Sealed Wheel Bearings

Most trucks equipped with straight roller bearings or precision tapered bearings can be furnished with sealed bearings at modest extra cost. Seals prolong equipment life by keeping lubricant in, dirt out. See page 12 for more detailed information.

Swivel Lock

Provides fingertip conversion of swivel caster into rigid caster when lock is engaged, and full-swiveling maneuverability when disengaged. See page 12 for more detailed information.

Floor Truck Lock

Step on pedal to lock, opposite pedal to unlock. Neoprene friction base, under pressure from compression spring, keeps truck from moving. Suitable for use on non-tilt trucks only.

All steel construction, with fully protected enclosed springs. Bolts onto truck frame. Normal installation is to mount between front swivel casters; for severe applications may dual mount one lock on each side of truck. Not intended as a dynamic brake or for use on inclines. See page 89 for more detailed information.

RUNNING GEAR ARRANGEMENTS

4-Wheel Caster Steer (2 swivel, 2 rigid). Most popular; easily turned or pushed straight, trails well.

4-Wheel Diamond Pattern (all rigid). Tilt-type, turns on center wheels. Lowest cost, suitable for light loads.

6-Wheel Tilt or Non-Tilt (4 swivel, 2 rigid). Recommended for heavy loads and extra long trucks. Turns in own length.

4-Wheel Non-Tilt (all swivel). Can be maneuvered in any direction. Ideal for confined areas, but needs swivel lock for straight-line steering.

4-Wheel Diamond Pattern (2 swivel, 2 rigid). Highly maneuverable. Usually tilt-type, can be non-tilt. Not recommended for ramps.

Wagon (Fifth Wheel Steer). Features large axle mounted wheels for heavy loads. Usually powered towed.

RUBBER BUMPERS

Doughnut Bumper

For use on ends of push handles (Styles D or E only). Size 3 1/4" diameter.

Corner Bumper

Fastened securely to truck corners through steel insert. Measures 3" long x 1" wide x 7/8" thick to match strip bumper for continuous installation.

Strip Bumper

Reinforced with durable insert and fastened to edges of truck frame. Size 1" wide x 7/8" thick to match corner bumpers.

MATERIALS AND FINISHES

Besides the steel, wood and aluminum trucks shown in this catalog, Hamilton can also produce trucks of stainless steel or with special finishes. Standard colors for painted steelwork, unless otherwise indicated in specifications, are Hamilton Red for steel two-wheel trucks and drum handling equipment, and Hammertone Blue for others except as noted. Safety Orange is a no-extra-cost option on caster-steer trailers, if specified. Wood tops are sanded and varnished, unless quoted otherwise. For special colors or finishes, consult factory for extra cost.

REPLACEMENT CASTERS, WHEELS AND PARTS

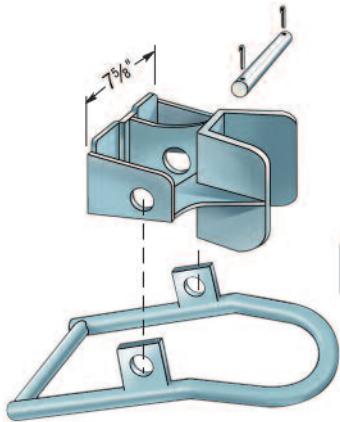

When you purchase a Hamilton Truck or Trailer, you do so with assurance a permanent record exists of its construction and specifications including exact model of caster, wheel and bearing supplied. This is true whether the product was standard or a "special" created just for you. As a result, it will be easy for you to order replacement parts at any time directly from the Hamilton Distributor nearest you.

Automatic Couplers

This is the automatic coupler almost universally seen on caster-steer trailers—interchangeable with most makes. Made in two capacities: the heavy duty

model for trailers of 3000-8000 lbs. capacity has steel bail and jaw sections; the light duty model for 1500-2500 lb. trailers has a fabricated bail section and smaller jaw assembly.

(Both are interchangeable with comparable competitive brands, but a light duty jaw will not accept a heavy duty bail.) Painted Hammertone Blue, specify if desired unpainted.

CP00040-P
Heavy Duty Bail—Wt. 30 lbs.

CP00030-P
Heavy Duty Jaw—Wt. 15 lbs.
(Distance between trailers when coupled 17 3/4".)

CP00020-P
Light Duty Bail—Wt. 15 lbs.

CP00010-P
Light Duty Jaw—Wt. 10 lbs.
(Distance between trailers when coupled 16 1/4".)

Manual Couplers

Lower in cost than the automatic type, these must be coupled or uncoupled manually. Another important advantage is that the wishbone half stands upright when not in use, while the eye protrudes minimally at the rear. (The eye can be mounted to pivot out of the way entirely where necessary). In addition to the standard wishbone hook/eye version, a loop-type wishbone coupler (for use with the pintle hitches) is also offered.

Painted Hammertone Blue, specify if desired unpainted.

Available in heavy duty configuration for 3,000-8,000 lb. trailers, and in light duty for 1,500-2,500 lb. trailers.

CP00060-P
Heavy Duty Wishbone—Wt. 18 lbs.
(Distance between trailers when coupled 22 1/4".)

CP00050-P
Heavy Duty Eye Wt. 2 lbs.

CP00070-P Loop Type Wishbone—Wt. 14 lbs. (Distance between trailers when coupled 23 1/4".)

CP00090-P
Light Duty Wishbone—Wt. 16 lbs.
(Distance between trailers when coupled 23 1/2".)

CP00080-P
Light Duty Eye Wt. 1.5 lbs.

HAMILTON®

LOOP AND PINTLE HITCH

Wagon type trailers commonly employ a towing tongue with loop at the front, and a pintle hitch at the rear. Hamilton's loop is drop forged steel; the hitches are cast steel designed for trailer capacities to 10,000 lbs. (Model **CP00120**) and 30,000 lbs. (Model **CP00110**) respectively. Both hitches come with safety chain and pin. Painted Black.

CP00110
Pintle Hitch
Wt. 9 1/2 lbs.

CP00120
Pintle Hitch Wt. 7 1/2 lbs.

CP00075
Loop Wt. 4 1/4 lbs.

ECONOMY BAIL

Available for use with the light duty jaw on trailers of 1,500 lbs. capacity or less is an "Economy" Bail, which utilizes a fixed, spring-loaded loop in lieu of the counter-weighted type. Because its vertical movement is limited, it should be used only on smooth, level floors.

CP00100
Wt. 7 1/2 lbs.

HAMILTON®

Series DS4400

Four-Wheel-Steer Trailers
Capacity Range
up to 100,000 lbs.

Hamilton Four-Wheel-Steer Trailers feature identical fifth-wheel-mounted axles at both ends connected by a steering rod. As the diagram indicates, turning the towing tongue causes the rear wheels to follow the front wheels through a nearly identical path... permitting use of more trailers and/or narrower intersecting aisles than either caster-steer or ordinary fifth-wheel-steer trailers.

When requesting a quotation please advise: **Quantity—Capacity—Deck size and type (wood, steel, safety plate)—Wheel type or floor conditions—Superstructure, if any—Reversible towing, if desired—Pintle hitch at rear.**

A popular option on the four-wheel-steer trailer is a reversible towing tongue. Hounds at both ends of the trailer are fitted with quick-release pins that permit moving the towing tongue from one end to the other. This permits reversing direction of the trailer or train with no turn-around space. Note that if multiple reversible four-wheel-steer trailers are to be towed in train, they must be equipped with pintle hitches at both ends.

Caster-Steer Trailers

Capacity Range
2,000 – 4,000 lbs.

CA1300
Capacity 3000-4000 lbs.
Steel frame, hardwood deck.
Heavy duty couplers.

CA1310
Capacity 3000-4000 lbs.
All steel construction.
Heavy duty couplers.

CA1108
Capacity 2000 lbs.
Steel frame, hardwood deck.
Some models PRONTO®.

QUALITY FEATURES

- Standard deck sizes: widths 30", 36", 42" or 48"; lengths 60", 72", 84", or 96". Special sizes available to suit.
- Standard running gears: **2,000 lbs. capacity**—Moldon Rubber wheels 12" x 3" on 1" dia. axle, swivel caster wheels 8" x 2", platform height 14". **3,000 lbs. capacity**—Moldon Rubber wheels 12" x 3" on a 1¼" dia. axle, swivel caster wheels 8" x 3", platform height 15¾". **4,000 lbs. capacity**—Moldon Rubber wheels 12" x 3½" on a 1¼" dia. axle, swivel caster wheels 10" x 3", platform height 15¾".
- Swivel casters drop-forged steel (80,000 psi tensile strength) with integrally forged kingpin, precision tapered thrust bearing and hardened ball raceways, unless otherwise specified.
- Casters bolted to structural steel cross bolsters.
- All corners mitered.
- Standard with one pipe rack 26" high above deck, and channel-reinforced external pipe sockets at swivel caster end. Additional rack(s), side sockets on request.
- Precision Ball or Tapered bearings in all wheels.
- Hardwood decks sanded and varnished; steelwork enameled Hammertone Blue (or Safety Orange if specified).

UNIQUE SPECIFICATIONS

CA1300 Wood deck: 1" select hardwood set flush in 3" x 2" x ¼" steel angle frame with two 2" x 2" x ¼" center longitudinals.

CA1310 All steel: 12 ga. deck welded to 3" channel frame and center longitudinal.

CA1320 Wood deck: 1" select hardwood set flush in 2" x 2" x ⅜" steel angle frame with full length 1" x 1" x ⅜" center angle.

CA1330 All steel: 12 ga. deck welded to 2" channel frame and center longitudinal.

Models CA1320 and CA1330 are designed for up to 2,000 lbs. capacity.

CA1108 Wood deck: 1" select hardwood set flush in 2" x 1½" x ⅜" steel angle frame. All wheels 8" x 2" with precision ball bearings.

Series WH casters bolted to ⅜" steel angle cross bolsters. Removable pipe handle in sockets with set screws. All wheels 8" x 2". Platform height 11¾".

HAMILTON®**Eleva-Truck Order Picking System****Capacity Range
1,500 – 4,000 lbs.****QUALITY FEATURES**

- Rugged design for safe, trouble-free operation
- Safety locking device for any make forklift
- Choice of platform sizes, wheels, racks and sockets

Greater strength, safer operation and adaptability to varying requirements has won preference for Hamilton's *ELEVA-TRUCK®* among material handling consultants and warehouse employees.

This four-wheel platform truck is specially designed for forklift "order selector" system that can cut stock-picking cost 50% or more. One worker achieves remarkable output, as the need to remove and respot entire pallet loads is eliminated. Instead *ELEVA-TRUCK®* accompanies the operator up to the merchandise, which is accumulated directly onto the deck. Thus more warehouse "cube" can be utilized by permitting retrieval of merchandise from high vertical racks.

Certain important features are required on this type of truck:

1. Sturdy, all-welded steel frame;
2. Longitudinal fork pockets under the deck afford maximum safety and strength;
3. Compatibility with forklift manufacturer's locking device;
4. Removable pipe rack(s) to fit into pipe sockets on the ends and/or sides of truck.

ELEVA-TRUCK® can be designed to fit any application, and they may also be equipped with couplers for towing.

COMMON SPECIFICATIONS

- Platform sizes to suit; popular widths 42" or 48", lengths 84" or 96".
- Capacities from 1,500 to 4,000 lbs.
- Wheels 6" or 8" Moldon Rubber or Polyurethane, in two swivel and two rigid casters to suit capacity.
- 10 ga. channel fork pockets sized and spaced for correct fork lift.
- Standard with one 36" high removable pipe rack in external sockets with set screws at swivel caster end. Additional racks or sockets if specified.

CAUTION!

Anyone working aboard a platform or cart elevated above floor level should wear a safety harness or similar device fastened to the powered forklift. It is the responsibility of the **USER** to insure safe operation of equipment in the workplace.

**EW7100**

Select hardwood deck in steel angle frame.

Internal sockets optional.

Shown with standard four-sided fork pockets.

**EM7200**

12 ga. steel deck on 2" channel frame.

External pipe sockets.

Shown with optional stirrup fork pockets.

To request quotation advise: **Quantity—Model No.—Capacity—Platform Size—Couplers—Type of wheels—Number and location of racks and sockets—Make and model of forklift—Including fork dimensions, spacing and detail of locking device.**

Auto-Steer Trailers

Capacity Range
up to 100,000 lbs.

AU4620

Two- or Four-Wheel Automotive-Type steering.

Automotive-type steering improves trailer stability by keeping the wheels under the load at all times. Features no-offset, drop forged steel swivel casters with precision tapered bearings. Choice of smooth steel, safety plate or open frame deck. Forged steel towing loop standard at front, pintle hitch at rear optional extra.

To request quotation, advise: **Quantity—Capacity—Size—Type of Wheels—Couplers—Two-Wheel or Four-Wheel Steer.**

Series FW4385 & FM4390

Fifth-Wheel-Steer Trailers

Capacity Range
up to 100,000 lbs.

FW4385/FM4390

Choice of hardwood deck or all steel. Single or dual-wheel models.

QUALITY FEATURES

- Engineered for power towing. Drop forged loop handle standard, heavy duty pintle hitch at rear extra-cost option.
- Rugged fifth wheel features low friction wear pad and precision tapered thrust bearing.
- Sizes: widths 42" x 84" minimum.
- Wheels equipped with precision tapered roller bearings.
- Woodwork sanded and varnished; steel-work enameled Hammertone Blue.

FIFTH WHEEL CONSTRUCTION

To request quotation, advise: **Quantity—Capacity—Type of Wheels—Size—Deck Type, Hardwood or Steel.**

UNIQUE SPECIFICATIONS

FW4385 has 2" select hardwood deck fastened to steel channel frame with flush steel hold-down angles and countersunk bolts.

FM4390 (shown) features smooth plate steel deck welded to reinforced structural steel frame (safety plate optional extra).

Rubber tread

Moldon Rubber:
1" thick 70D rubber, tensile strength exceeds 1,000 psi

QUALITY FEATURES

- Select hardwood construction for 1,500 lbs. capacity.
- Friction-type 6" diameter fifth wheel with T-handle grip.
- Front axle 1¼" square with ends turned to 1", rear axle 1" round.
- Wheels equipped with straight roller bearings and lube fittings.

To order, specify model number and suffix.

FW4215
Flush hardwood deck.

FW4548
Without sides.

FW3548
Convertible maintenance wagon with 12" high removable sides.

Semi-Live Skid System
Capacity Range
up to 2,500 lbs.

LJ700 Lift Jack
8" x 2" or 8" x 2½" wheels.

SB715
Select hardwood deck
in steel frame.

QUALITY FEATURES

- Steel pipe handle welded to hook and axle housing (designed only for use with Model SB715 or SM720 Skid Trucks).
- Comfortable vinyl handle grips.
- Maintenance-free; no springs or troublesome parts.
- Stands upright when not in use.
- Specify with 8" x 2" or 8" x 2½" wheels to match size and type on skid trucks.

Shippable via **UPS**.

To order, specify model number and suffix.

Chair and Table Trucks

Model FC60 (60" long) provides economical chair handling for convention halls, hotels, churches and other institutions.

Complementing table trucks are available in flat or edge storing styles, 30" wide x 72" long x 35" high. Materials and casters are same as chair trucks. Specify **FS3072** for flat storing or **ES3072** for edge storing type. Weight 80 lbs.

QUALITY FEATURES

- All welded frame of steel angle with two removable end rails 30" high above frame.
- Four swivel casters with 3½" *Ebonite* wheels. Two extra rigid casters provide center support on models **FC84** and **FC96**.

Steel & Wood Dollies

Capacity Range

600 – 5,000 lbs.

Heavy Duty Dollies

Ideal for handling large rolls of paper or other cylindrical objects. Size 36" long x 24" wide x 15¾" high to bottom of concave. Frame of 6" x 4" x 3/8" steel angle encasing hardwood contact blocks. Four plate steel rigid casters with 8" x 2½" roller bearing wheels. Balances on two center casters for maneuverability. Weight 275 lbs.

DW245-M with Metal wheels.

DW245-P with *Plastex* wheels.

DB245
Capacity 4,000 lbs.

DB273
Capacity 3,000 lbs.

Hardwood contact boards are bolted to a heavy-duty frame of 3" x 2" x 1¼" steel angle. Size 18" wide x 24" long x 7½" high. Four swivel casters, with 5" x 2" roller bearing *Plastex* wheels. Weight 67 lbs.

DM261
Capacity 5,000 lbs.

Heavy duty all purpose dolly. 15" x 24" steel frame, six 4" x 3" metal wheels roll on 1" axles.

Drum Dollies

Rugged frame of ¼" x 3" steel. Four swivel casters bolted on. Inside diameter 23½". Load height of DM232 is 3½". Load height of DM233 is 4¼". Weight 30 lbs.

DM232-EO with 3" x 1¼" *Ebonite* wheels, cap. to 800 lbs.

DM232-M with 3" x 1¼" Metal wheels, cap. to 1,000 lbs.

DM233 with 3" x 1¼" *Plastex* wheels, cap. to 1,200 lbs.

★ *Shippable PRONTO®* via UPS.

★ **DM232 & DM233**
Capacity 1,200 lbs.

The cross-frame design of Models DM232 and DM233 makes it easy to load drums on and off—no need to lift them over a circular rim as on some models. Both models accommodate standard 55-gal. and 30-gal. drums.

Wood Dollies

Mover's dolly size 18" wide x 30" long x 6½" high features hardwood construction with non-marking rubber end caps to protect load. Contoured side rails enable easy carrying. Equipped with four swivel casters with choice of 3½" diameter wheels. Weight 28 lbs.

★ *Shippable PRONTO®* via UPS.

DW236-EO with oilless bearing *Ebonite* wheels.

DW236-NF with ball bearing *Poly-Tech®* wheels.

★ **DW236**
Capacity 700 lbs.

Flush deck of 1½" x 5" hardwood, open frame. Two sizes: 16" x 27" or 20" x 30". DW243 has four swivel casters with 3" diameter wheels—overall height 5½". Weight 25 lbs. DW244 has four swivel casters with 4" diameter wheels—overall height 6¾". Weight 30 lbs.

★ *Shippable PRONTO®* via UPS.

DW243-E or DW244-E with *Ebonite* wheels.

DW243-M or DW244-M with Metal wheels.

Specify size.

★ **DW243**
Capacity 700 lbs.

★ **DW244**
Capacity 1,000 lbs.

Nomenclature & Styles of Superstructures

Model (Series) Number

Selection Suffix- found in Selection Tables

NUMBERING SYSTEM

PW800 - M - M3060

Style of superstructure; M indicates four wood stakes (See Below).

Type of wheels— here Metal

Platform size (width x length) in inches—here, 30" wide x 60" long.

†Platform size is always measured on the platform, exclusive of superstructure protrusions. Be sure to allow extra clearance for external pipe sockets, push handles, etc.; length or width including all protrusions is overall length or overall width.

STYLES OF SUPERSTRUCTURES

For carrying certain materials, standard flat trucks are often made safer, more convenient and more efficient by changing or adding handles or racks (superstructures).

Not every platform truck listed in the following pages can be furnished in every

style. See the individual pages for listing of alternate styles available, if any; and see the price list for applicable addition or deduction of list price in each case.

When adding to superstructure, remember to allow clearance for increases in over-

all length or width caused by external pipe sockets, offset handles or racks, etc. Of course, styles of superstructures other than those shown here are also available—see pages 112-113.

Style A. One removable pipe handle 26"† high above deck.

Style C. Four removable pipe stakes 26"† high above deck.

Style D. Two bolted on steel racks 28"† high above deck.

Style E. One bolted on steel slatted rack 28"† high above deck.

Style F. Two removable pipe handles 26"† high above deck.

Style G. Two removable pipe handles 26"† high above deck.

Style H. One removable slatted pipe handle 26"† high above deck.

Style I. Two removable steel slatted pipe handles 26"† high above deck.

Style J. One removable steel latticed pipe handle 26"† high above deck.

Style K. Two removable steel latticed pipe handles 26"† high above deck.

Style L. Two removable hardwood stakes 29"† high above deck.

Style M. Four removable hardwood stakes 29"† high above deck.

† Certain exceptions occur on a few models, and variations of more than 1" are spelled out on individual specifications.

Platform Trucks Capacity Range 4,000 – 5,000 lbs.

PW907-A
Narrow track to fit scales.

PM5600-A
Heavy duty, all steel.

To order, specify model number and suffixes.

‡ PM5600 only.

QUALITY FEATURES

- Load wheels 16" x 3" for 4,000 lbs. capacity, or 18" x 3" for 5,000 lbs. capacity, on 1 1/4" dia. common axle.
- Forged steel swivel casters #S-CH-12 with 10" x 3" wheels for 4,000 lbs. capacity, or #S-CH-12 with 12" x 3" wheels for 5,000 lbs. capacity
- Roller bearings and lube fittings in all wheels.

UNIQUE SPECIFICATIONS

PW907 has 1" select hardwood deck and 2" x 4" hardwood frame with reinforcing center longitudinal. Rounded corners and internal pipe sockets at both ends. Available with Superstructure Styles A, C, F, G, H, I, J, and K.

PM5600 has 12 ga. smooth steel deck welded to 3" steel channel frame and reinforcing center longitudinal. Mitered corners at both ends. Available with Superstructure Styles A, G, H, and J.

QUALITY FEATURES

- Flush 1" hardwood deck set in 3" x 2" x 3/16" steel angle frame with reinforcing center longitudinal.
- Forged steel swivel casters #S-CH-12 with 10" x 3" wheels, and 16" x 3" load wheels on 1 1/4" dia. common axle. Roller bearings and lube fittings in all wheels.
- Channel-reinforced pipe sockets with set screws.
- Platform height 17 3/4".
- Capacity 4,000 lbs.

Available with Superstructure Styles A, G, H, and J.

85A Poly on Aluminum Core

M.O. Rubber
1" thick 70D rubber, tensile strength exceeds 1,000 ps

Platform Trucks

Capacity Range
1,000 – 2,000 lbs.

QUALITY FEATURES

- Deck of 12 gauge steel.
- All welded frame and full length center rail of 2" steel channel.
- Roller bearings and lube fittings in all wheels.
- Casters bolted to 3/16" steel angle cross bolsters.
- Removable pipe handle in sockets with set screws.

UNIQUE SPECIFICATIONS

Model PM5106 trucks have 6" x 2" wheels in two swivel and two rigid casters. Platform height 9¾".

Model PM5108 trucks have 8" x 2" wheels in two swivel and two rigid casters (except with Pneumatic tires, size 8" x 2.80/2.50-4, 4-ply rated). Platform height 11¾", 13½" with 8" Pneumatics.

Model PM5112 trucks have 12" dia., 4-ply 4.10/3.50-6 Pneumatic-tired wheels in two swivel and two rigid casters. Platform height 17½".

For aluminum platform trucks in this capacity range, see page 114.

A-Frame Trucks

Capacity Range

800 – 2,000 lbs.

QUALITY FEATURES

- All steel frame with 3/16" angle base, 1" pipe A-frame, and 1/4" angle nose plate.
- A-frame and nose 30" wide; nose 4" deep. Overall size 22 3/4" wide x 42 5/8" long x 47" high.
- L-shaped lugs on rear of frame support length of pipe which can be inserted to support extra-long loads.
- Four swivel casters with 5" x 1 1/2" roller bearing Metal, Moldon Rubber or *Plastex* wheels.
- Capacity 1,500 lbs. except on Moldon Rubber wheels which limit capacity to 800 lbs. Weight 100 lbs.

★AF472-M with Metal wheels.

★AF472-P with *Plastex* wheels.

★AF472-R with Moldon Rubber wheels.

★Shippable **PRONTO®**.

★AF472

Easy way to move sheets and panels.

Push truck into position. Step on frame and pull back to break over load.

Panels will rest on four wheels ready to roll.

AF475
Capacity 2,000 lbs.
Choose flat or 90° sloped deck.

QUALITY FEATURES

- Solid hardwood construction: deck 1" thick, frame 1 3/4" x 4".
- Deck height 14 1/2". Overall height 55". Load width 11" each side.
- Load wheels 10" x 2 1/2" on 1" common axle at center; slight tilt permits balancing load to turn in its own length.
- Four swivel casters with 6" x 2" wheels.
- All wheels Moldon Rubber with roller bearings and lube fittings.

AF475-1—platform size 36" x 60". Weight 290 lbs.

AF475-2—platform size 36" x 72". Weight 305 lbs.

★HM44-E

★HM44-K

★HM52-B
Shown with 8" Ace-Tuf® Rubber-tired wheels.

★HM53-K

Designed for proper balance and rigidly welded of high alloy steel tubing, *Lite-N-Tuf*® all-welded steel hand trucks embody Hamilton quality at a competitive price. Steel frames of 1 1/8" O.D. high yield tubing, red enamel finish (yellow on HM44-K and HM53-K), and vinyl handle grips are standard features on these models.

HM52-B and HM44-E hand trucks feature solid bar steel curb skids, beveled nose edges, strong "back-up" nose design, and extra large stair skids. Choice of wheels listed below.

HM44-K is the widest model available and is furnished standard with 6" x 2" *Versa-Tech*® wheels.

HM53-K features 8" x 2.50 *Ace-Tuf*® ball bearing wheels, and a 65" tall frame ideal for carrying bread racks or other bulky high loads.

Newly added model HM44-S is all stainless steel, including hardware. Wheels have *Delrin*® bearings.

★HA79
Convertible

★ Stocked for **PRONTO**® shipment—via UPS or RPS.

Lightweight design for easier handling. Helps reduce fatigue on delivery truck drivers. Aluminum frame made of extruded channel side rails with tubular cross supports for increased durability. Extruded aluminum nose plate/axle bracket has tapered leading edge to assist loading, interlocks with frame and axle for maximum strength.

Newly added convertible models HA78 and HA79 can be used as either hand trucks or platform trucks. The conversion latch system is engineered for simplicity so there are fewer moving parts resulting in more reliability and longer life. Only available with 10" pneumatic tires.

HOW TO ORDER: Select base model, wheels and accessories. In the example shown below, Model 71 would include 10" Pneumatic-tired wheels, and folding baggage rack.

* Capacity limited to 1,200 lbs. with 8" Pneumatic tires.

Table Trucks
SH5030 Capacity 1,500 lbs.

- Size 30" wide x 40" long x 31" high overall. Special sizes also available—advise details.
- Top of 14 ga. sheet steel reinforced with 1 1/2" x 1 1/2" x 3/16" angle center support.
- Bottom frame, corner uprights and caster bolsters all 1 1/2" x 1 1/2" x 3/16" angle.
- Casters two swivel and two rigid with 6" x 2" Versa-Tech® wheels, or 6" x 1 1/2" Metal or Plastex wheels.
- Roller bearings in all wheels.

SH5030-M with Metal wheels.

SH5030-P with Plastex wheels.

SH5030-TE with Versa-Tech® wheels.

Bar Handling Trucks

BH485 5 ft. long—3,000 lbs. capacity.

BH488 8 ft. long—6,000 lbs. capacity.

Bar Handling Trucks Elevated cradles speed loading/unloading by forklift or overhead hoist. Tilt-type running gear permits turning in its own length. Standard with one swivel caster at each end, but available with two swivel casters at each end when uneven floors exist. Frame and uprights constructed of steel channel. Cradles made of 3/8" flat steel 15" deep.

BH485 is 26" wide x 60" long x 32" high overall with two 12" x 2 1/2" load wheels on a 1" dia. axle and two forged steel swivel casters with 8" x 2" roller bearing wheels. Weight 250 lbs.

BH488 is 26" wide x 96" long x 33 1/2" high overall with two 12" x 3" load wheels on a 1 1/4" dia. axle and two forged steel swivel casters with 8" x 2 1/2" roller bearing wheels. Weight 460 lbs.

To order, specify BH485-D or BH488-D with Duralast® polyurethane wheels; 485-M or 488-M with Metal wheels; 485-P or 488-P with Plastex wheels.

AXLE BRACKETS

These iron castings are designed for maximum strength. Set screws are furnished with all models. Special styles fabricated from plate steel can be quoted on application. Dimensions given below are in inches.

STAKE SOCKETS

Fabricated except Nos. 2CB, 30 Left and 30 Right which are cast iron. When ordering sockets made in rights and lefts, order specifically or in pairs.

No. 296L Left – No. 296R Right. For 1" pipe standards; 3 $\frac{1}{2}$ " deep.

No. 800. For wood stakes 1 $\frac{3}{8}$ " x 2 $\frac{1}{4}$ "; 4" deep. **No. 880L Left – No. 880R Right.** For 1" pipe standards; 4" deep.

No. 2 CB. For 1" pipe standards; 4" deep.

No. 10L Left– No. 10R Right. Welds on. For 1" pipe standards; 3 $\frac{1}{2}$ " deep.

No. 30. Left –31 Right. For wood stakes 1 $\frac{3}{8}$ " x 2 $\frac{1}{2}$ "; 6" deep.

Date _____

1. For _____ Company Name _____ City & State _____ Mr./Ms. _____ Name _____

2. Use: To transport _____ from _____ to _____

3. Quantity: _____ Load capacity (net) _____ lbs. Floor Type: _____

4. Type truck: Platform; Shelf; Box; Trailer; Caster-Steer; Four-Wheel; Skid; Semi-Live; Dolly;
 Fifth-Wheel; Auto-Steer; Dead;

Other _____

5. Dimensions (inches) Inside _____ wide x _____ length x _____ high above floor.
 Outside _____ wide x _____ length x _____ high above deck.

If possible, include a drawing or sketch via fax or e-mail

6. Constructed of: Frame: _____ Deck: _____ Superstructure: _____

7. End Racks / Push Handles / Stakes: Number _____ Style _____

Permanent. Location: _____ Ht. above deck: _____
 Removable.

8. Shelves: How many? _____ (include top and bottom) Capacity per shelf: _____ lbs.

Clearance between shelves: _____ Edges turned up (_____ ")
 down.

9. Running gear: How many swivel casters? _____ Size: _____ dia. x _____ face.

How many rigid casters / load wheels? _____ Size: _____ dia. x _____ face.

Arrangement: Diamond Pattern. 4-Corner Pattern. If Diamond: tilt-type. non-tilt. Six-Wheel.

Type wheels desired: _____ (Consult pgs. 12 -13 of catalog.)

Type bearings desired: _____ (Consult pg. 11 of catalog.)

10. Other accessories? Floor Truck Lock; Couplers; Swivel Lock; Wheel Bearing Seals;

Wheel Brakes; Other: _____

Details: _____

11. Any critical clearances (for doorways, elevators, scales, etc.)? Specify _____

12. Special finish or color? _____ Special markings? _____

Date _____

1. Is this requirement for a new or a replacement caster?
 - a. If for replacement, what brand/model of caster is the customer currently using?

Brand _____ Model# _____
 - b. If unknown: Wheel type _____ Wheel size _____
 Top Plate Size _____ Bolt Centers _____ Height _____
2. How many casters/wheels are needed per piece of equipment?

Swivels _____ Rigids _____ Wheels only _____
3. How much capacity per caster/wheel is required _____ lbs.
4. How will the load be applied?
 - a. Suddenly (Shock loaded-Timed cycle)
 - b. Gradually
 - c. Both a & b
5. What type of floor(s) will caster/wheel operate on:
 - a. Wooden
 - b. Concrete
 - c. Tile
 - d. Asphalt
 - e. Carpet
 - f. Other _____
6. What are floor conditions?
 - a. Smooth
 - b. Uneven
 - c. Obstructions

If so, what types? _____
7. Is noise a factor? Yes No
8. Are any unusual environmental conditions present?
 - a. Temperature – high or low, approximate degrees _____
 - b. Chemicals – what kind and how will caster be exposed _____

 - c. Water/steam-temperature? _____ Submersion? _____ Length of exposure? _____
 - d. Dirt Sand Grease Oil
 - e. Other environmental conditions? _____

9. How will conveyance (equipment) be moved?
 - a. Manual
 - b. Towed

If towed, how fast? _____ how often? _____ Other _____
10. Are there any other requirements? _____

HAMILTON®

Super heavy duty ductile iron flanged track wheels are rated at 18,000 lbs.

Specially molded flanged *Plastex* wheel.

Manganese bronze is an option where non-sparking wheels are a must.

Unusual center flange guide wheel rigid caster for 5,000 lbs. capacity.

Have it your way! This single flange bronze wheel was designed for a telescope.

Castors furnished with manganese bronze wheels are well-suited for environments requiring spark-proof wheels.

Special wheels engineered by Hamilton for unusual applications include (l. to r.) urethane-coated flanged wheel, offset hub two-component urethane wheel, and urethane-coated V-grooved wheel.

Dual purpose, triple wheel swivel caster provides floor protection when not running on angle track.

Urethane pallet rollers like this are available on special order with bore and bearing specifications to suit customer requirements.

This forged steel wheel has been fitted with a special square bearing allowing it to turn on a square shaft.

Dual wheel 18" dia. cushion-tired rigid caster for 10,000 lbs. capacity.

AGV Casters are custom engineered from popular MD, EHD, and HS swivel assemblies. Heights, offsets, and capacities can be tailored to suit.

Fig. 1399 Caster-Steer Trailer features fifteen storage compartments on each side, and rotates on turntable for easy access.

Fig. 1177 Stainless Steel Cart with brackets along top frame for holding bottle capping spindles submerged in removable oil pans.

Fig. 1394 Caster-Steer Trailer with protective nylon-lined cradles to carry precision shafts for the paper industry.

Fig. PA3642-NT-6P Economical way to keep palletized loads moving when not on the fork truck.

Fig. 3457 "Broke" Paper Trailer designed with cut-outs for access to load and automatic couplers for towing.

Fig. MA428 Building materials cart is ideally suited for carrying bulky loads in home repair and hardware stores.

Fig. XT0494 - The V-shaped superstructure has a resilient rubber surface for holding printing press rollers.

Fig. 7272 Heavy Duty Skid Trailer is designed with fork guides mounted to fifth wheel for forklift operation.

Fig. 478 Six wheel platform truck enhances maneuverability, and permanent sides facilitate carrying large door panels.

Fig. XT1018 This unique superstructure is for hauling proprietary submarine components.

Fig. DS4440 Four-wheel steer trailer with reversible towing tongue facilitates bi-directional towing.

Fig. XT1281 Six dual wheel Maxi-Duty casters support this dolly equipped with interior fork sockets on all sides.

Fig. 476 Lightweight Aluminum A-Frame Truck used to carry large sheets of plywood, glass, doors or paneling.

Fig. 0301 Sturdy Platform Truck with permanent end rack at one end and "stop" at the opposite end for retaining shower doors.

Fig. 4057 "Broke" Paper Trailer features hinged door at rear and automatic couplers for towing.

These custom-engineered casters, wheels and trucks on these two pages are from actual customer orders. Our engineering creativity coupled with 3-D design software enabled the customer to preview the finished product before we ever cut the first piece of metal.

Poly-on-steel single flanged track wheel used on tumbler for washing parts.

Double flanged wheel with stainless steel ball bearings for railroad application.

EHD V-grooved caster equipped with steel brushes for removing dirt from tracks.

Oscillating caster handles 30,000 lbs. loads on uneven floors.

Special tapered face flanged trolley wheel for two-ton hoist.

Maxi-Duty based caster with Nylast® wheels and brake used on armored vehicle carrier.

4,000 lbs. capacity oscillating AGV caster.

Maxi-Duty based swivel caster with guide rollers for circular track.

HAMILTON®

Fifth-wheel steer trailer with heavy duty automatic coupler bail rolls on solid pneumatic tires. Trailer hauls three ton loads from warehouse to air craft transport to destination.

All purpose Eleva-truck® with side compartments for awkward parts. Includes writing shelf and tool holder.

Dual-wheel auto-steer assembly is used under mobile compressor unit. An assembly mounted at each end of the unit enables towing from either end.

Move up to 30 tons on this reversible four-wheel steer trailer. Lashing rings for securing or lifting load.

The protruding flanged track wheels facilitate a low overall deck height on this rail dolly. Removable pipe handles at both ends and grip handles welded to side frames.

Guide system in trailer activates dual gravity conveyors transferring cargo to stationary conveyor system.

Semi-live fifth-wheel skid trailer with removable stakes.

Open frame dolly height matches customer's machine for ease of loading ten ton dies. Casters with swivel locks and brakes provide maximum maneuverability and flexibility.
